_____

TYPICAL SOFTWARE FOR SOIL SURVEYS

_____

The following is a list of some of the computer software used by the Geotechnical Bureau in the preparation of soil surveys. Note that some of these programs must be purchased from private vendors, while others are in the public domain:

Program	Application
1. Stabl6, WinStabl	Slope Stability Analysis
2. StrataSlope	Reinforced Slope Design
3. Pipe Materials	Selection of allowable pipe culvert materials
4. SETTLE	Settlement Analysis
